	Price		Yield To Maturity	
Maturity on April 2029[1]	$ 100.62	▲ $ 100.85	%6.21	▼ % 6.11
Maturity on October 2032[2]	$104.25	▲ $ 104.85	% 7.20	▼ % 7.15

(Table showing the performance of Egyptian sovereign sukuk on 07/08/2026)

The Egyptian sovereign international Sukuk witnessed positive performance during the trading week ended (07/08/2026), as Sukuk prices increased, accompanied by a decline in yields to maturity, as shown in the table above. This performance reflects a relative improvement in investor appetite for sovereign debt instruments, amid developments in global financial markets during the week.

The increase in Egyptian Sukuk prices came amid a decline in U.S. Treasury yields, which are among the key determinants of global debt market trends, following the release of U.S. labor market data by the U.S. Bureau of Labor Statistics on Friday, (07/08/2026). The data showed that nonfarm payroll employment declined by 23,000 jobs in July, while the unemployment rate remained unchanged at 4.1%[3]. Overall, these data reinforced concerns over a slowdown in the U.S. labor market, thereby increasing market expectations of potential interest rate cuts going forward.

In addition, weekly data on U.S. initial jobless claims released by the U.S. Bureau of Labor Statistics on Thursday, (06/08/2026), showed that the number of new claims increased to 199,000 for the week ended August 1, compared with 198,000 in the previous week[4]. Although the level of claims remained relatively low, the increase, coupled with weaker monthly employment data, provided additional indications of developments in the U.S. labor market.
