	Price		Yield To Maturity	
Maturity on April 2029[1]	$ 100.85	$ 100.83	%6.11	% 6.11
Maturity on October 2032[2]	$104.52	$ 104.82	% 7.15	% 7.08

(Table showing the performance of Egyptian sovereign sukuk on 14/08/2026)

Egyptian sovereign international sukuk showed mixed performance during the week ending 14/08/2026. The sukuk maturing in October 2032 rose in price from $104.52 to $104.82, accompanied by a decline in the yield to maturity from 7.15% to 7.08%. In contrast, the sukuk maturing in April 2029 recorded a marginal price decline from $100.85 to $100.83, while its yield to maturity remained stable at 6.11%.

This performance came amid mixed developments in global markets. The U.S. Consumer Confidence Index fell to 51.0 points in August 2026, compared to 55.2 points in July, a decline of about 7.6%. Meanwhile, 12-month inflation expectations rose to 4.3%, up from 4.2% in July[3], reflecting continued concerns over inflationary pressures and the cost of living.

At the same time, the long-term U.S. bond market saw borrowing costs rise, as the U.S. Treasury sold $25 billion of 30-year bonds at a yield of 5.216% [4], the highest yield in an auction of this tenor since 2001. This rise in long-term yields reflects investors' continued concerns over inflation, the trajectory of public finances, and borrowing needs, pointing to persistent pressure in global debt markets, particularly on long-term debt instruments.

Overall, Egyptian sovereign sukuk performance during the week was characterized by relative stability, with a positive tilt for the issuance maturing in October 2032, despite continued external pressure stemming from rising long-term U.S. bond yields and growing uncertainty over the path of inflation and global monetary policy.
